

Kush Mittal

Noida | Java Backend Developer | Spring Boot | Microservices

mittalkush1999@gmail.com | 7455951803 | LinkedIn.com/in/kush-mittal | Leetcode.com/u/kush_mittal

Profile Summary

Results-driven Java Spring Boot Developer with 3+ years of experience delivering secure, scalable, & cloud ready microservices at enterprise scale. Proven track record of reducing API latency by 35%, accelerating deployments by 40%, and improving decision-support accuracy by 30%. Skilled in Java, Spring Boot, Multithreading, Kubernetes, Kafka, and PostgreSQL/MySQL, with hands-on experience in AWS and DevOps automation (CI/CD, monitoring, containerization). Adept at applying design patterns, secure coding practices, and Agile methodologies to deliver reliable, compliant, and business-impactful software solutions.

Skills

Programming & Frameworks: Core Java, Multithreading, OOP, Design Patterns, Spring Framework, Spring Boot, REST APIs, Microservices Architecture

Architecture & Tools: API Gateway, Kafka, Docker, Maven, Git, Jenkins

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Cloud: CI/CD Pipelines, Containerization, Basic AWS, Monitoring & Logging

Methodologies: Agile/Scrum, Secure Coding Practices, Design Patterns

Professional Experience

Software Engineer, Inditech – Noida

July 2025 – Present

- Developed and enhanced backend services for an Insurance Policy & Claims Management System using **Java, Spring Boot, and Spring Data JPA**, implementing RESTful APIs and modular architecture for policy and claims processing.
- Optimized **MySQL queries and implemented pagination**, reducing average API response time by **25–30%** and improving performance for high-traffic endpoints.
- Implemented secure authentication and authorization using **Spring Security and JWT**, ensuring protection of critical APIs and role-based access control.
- Improved system reliability by introducing **centralized logging and exception handling**, reducing production issue resolution time by **30%**.
- Delivered **15+ production features** and resolved **40+ issues**, contributing to improved system stability and smoother user experience.

Software Engineer, Wipro – Gurgaon

Dec 2022 – July 2025

- Developed scalable backend services using **Java and Spring Boot**, building secure and efficient REST APIs for enterprise applications.
- Integrated **Kafka for asynchronous processing** and **Redis for caching**, improving data processing efficiency by **20–30%** and reducing database load.
- Implemented **OAuth-based authentication**, enhancing system security and ensuring secure access to services.
- Contributed to **Docker-based containerization and CI/CD pipelines (Jenkins)**, reducing deployment time by **25–35%**.
- Enhanced observability by implementing **monitoring and logging solutions**, improving debugging efficiency and reducing incident resolution time by **30–40%**.

Education

G.L.A. University Mathura, B.Tech. in Computer Science and Engineering

Aug 2018 – Jun 2022
